

OTTO PUBLIC FURNISHING

Campus
A system for the
separating waste

A family of bins for private and public areas; indoors and outdoors.

Quality in a clear shape

The new Campus family is guaranteed to fit into your concept. It feels particularly at ease in heavy usage areas such as railway stations and airports, exhibition centres and shopping malls. The versatility of the Campus is its greatest strength, it can be used anywhere both public and private areas, indoor and outdoor.

Include it in your plans!

Optional hood can protect against the rain. There are many configurations for the Campus ranging from a single litter bin to a 4 in 1 recycling system providing greater flexibility when designing new recycling and litter collection initiatives.

Campus

EFFICIENCY AND STYLE

A team player.

The Campus' aesthetic design enables it to discretely blend in with every surrounding. The contrasting, dark base area reduces visibility of dirt.

Flexibility and volume.

Campus Solo

Campus Duo

Campus Trio

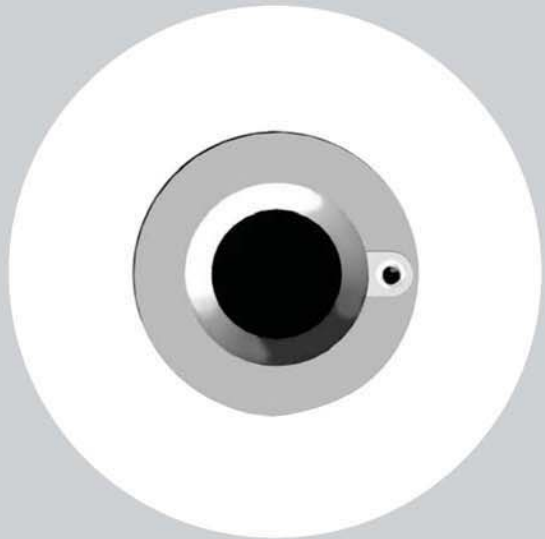

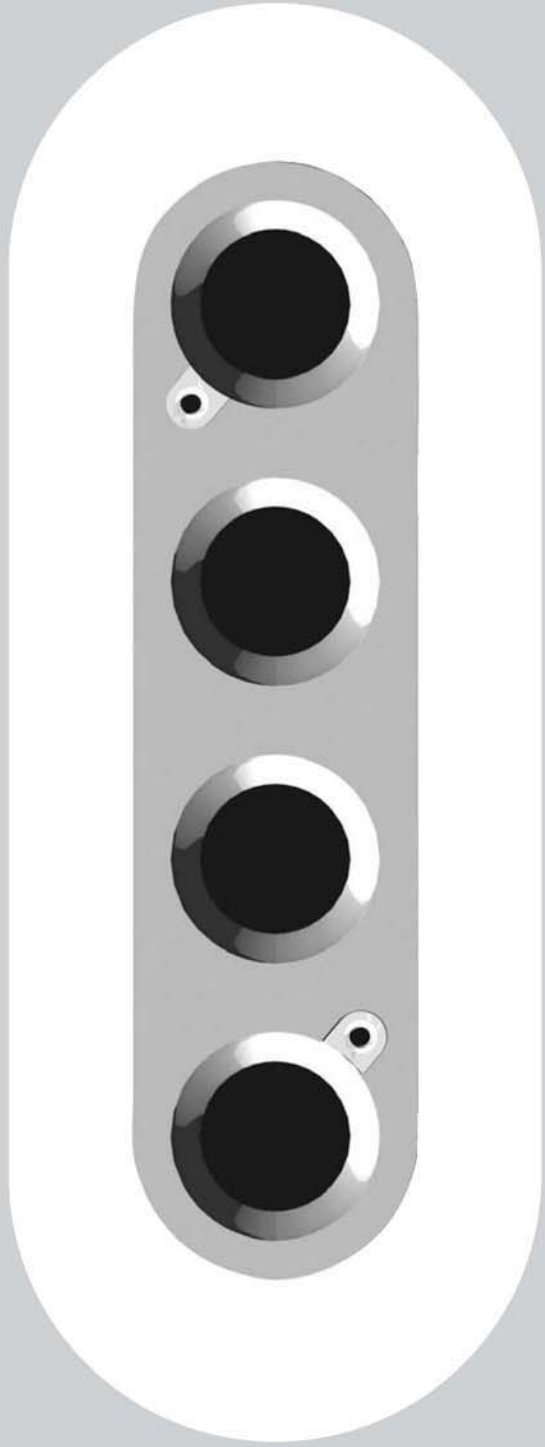

Campus Quattro

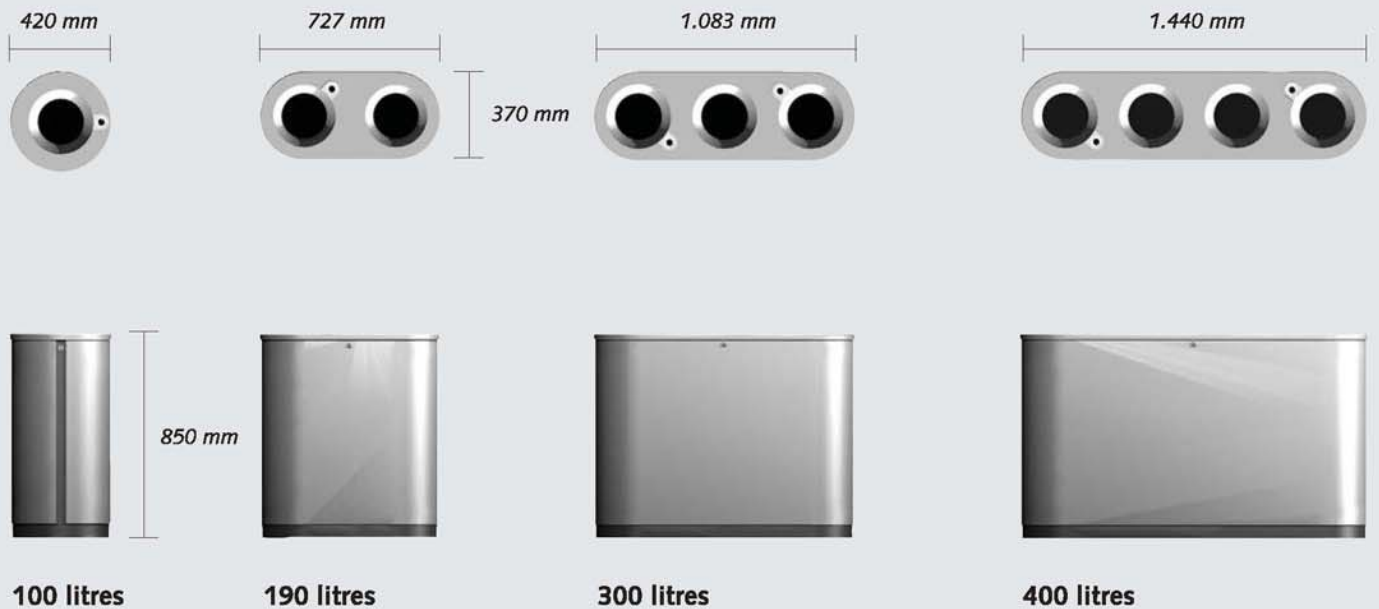

WE FIT INTO YOUR CONCEPT!

Quality in the details.

It's sleek design enables the Campus to be easily cleaned and maintained. The integrated ashtrays are accessible and easily emptied.

Aesthetics meet functionality.

Shape = Function

More than 70 years of experience in the development of containers guarantees a high level of competence with regards to function and efficiency. The design of the Campus means that only a minimum amount of space is required for emptying.

Information and consultancy.

We are at your service; we help you in all planning phases, from conception to installation to maintenance.
